

## Higher Self Chakra:

Kings and Priests in Ancient Egypt were familiar with far higher spiritual levels than we in our time can imagine.

They had knowledge about other spiritual worlds in the universe, and they were able to 'remember' to be part of the Divine Unity.

Papyrus oil is for the 8<sup>th</sup> Chakra, which exists between the Human and the universe, it leads us to be part of all, how to be able to be and to communicate with other worlds and to be able to shine, to deliver and to give.

It allows us to reconnect with our higher self.

The Papyrus-oil shows the way to be above and below, to communicate between the universe and human, between masculine and feminine and between all opposite sides, also to let your imagination go very far away, not to be on a tight physical level, but to enjoy communication as a "member" of the whole universe.

Papyrus-oil connects us with circumstances or past lives of many, many thousand years ago, so that we can face very different lives on the Earth or on other planets, as well as to remember our knowledge and our potential, to use it here and now.
